

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

provision of this section or refusing or neglecting to properly disinfect and clean any car when so directed, as herein above required, shall be subject to a penalty of \$50 for each and every such offense.

Common Drinking Cups—Prohibited in Public Places. (Reg. Bd. of H., Sept. 8, 1914.)

SEC. 62. *Drinking cups for common use forbidden.*—No person, firm, or corporation as owner, agent, employee, or person in charge or control of any railroad or railway station, located within the county of New Hanover, any railroad or railway car or train operated from point to point within said county, any public, private, or parochial school, any municipal or office building, any lodging or boarding house, hotel, club, theater, public hall, playground, factory, office, store, market, or public structure of any name or description whatsoever, shall keep, offer, exhibit, or display for common use, any drinking cup, glass, or other receptacle. Any person, firm, or corporation violating any of the provisions of this section shall be subject to a penalty of \$10 for each and every such offense.

Common Towels—Prohibited in Public Places. (Reg. Bd. of H., Sept. 8, 1914.)

SEC. 63. *Towels for common use forbidden.*—No person, firm or corporation owning, in charge of or in control of any lavatory or wash room in any hotel, restaurant, factory, store, market, office building, school, public hall, railway station or public place or building, shall maintain in or about such lavatory or wash room any towel for common use, nor shall they or any of them expose for use or allow to be exposed for use in any such place, any towel, to be used by more than one person such as that now known as the roller towel. Any person, firm, or corporation violating any provision of this ordinance shall be subject to a penalty of \$10 for each and every such offense.

Water Supplies—Protection of Water System from Contamination by Connection with Fire Pumps. (Reg. Bd. of H., Sept. 8, 1914.)

SEC. 64. *Connections between fire pumps and public water supplies.*—Whenever any factory or mill, warehouse or other place shall install or maintain for private use any fire pump or other pump connected with any circulation or sprinkler system which in turn is connected either directly or indirectly with the mains conducting a public water supply in the county of New Hanover, application shall be made to the board of health for a permit for such connection, and no such connection shall be made or maintained without a permit from the board of health.

All connections such as are described above shall be subject to inspection by agents of the board of health, and whenever such inspection shall show that the said connections are not made and maintained in conformity with the requirements hereinafter imposed said connection or connections shall be discontinued until such time as the requirements of the board of health shall have been completely fulfilled.

Every connection now existing or hereafter made between the private water system of any mill, factory, warehouse, or other such place and any public water system shall be provided with an efficient gate valve situated between the fire pump or other pump provided for such private system and the circulation system which is connected with said public water supply.

There shall be provided at the point of connection between the said private water system and the mains of the said public water supply a check valve of approved make and design.

The aforesaid gate valve situated between the pump of the private water supply and the circulation of said supply shall be closed and sealed by the agent of the board of health at the time of its installation, and shall be opened only for the purposes of inspection or test by him or in his presence, save and except at such times when in
